

PART 1

UTILITY NOTICE

Name _____ Date _____

Address _____

Pipelines, electric lines, telephone wires, and other utilities can be damaged by digging or construction work. Any contact with above-ground or buried utilities poses a hazard to life and property. You should take action to prevent personal injuries and damage to utilities from accidental contact.

The Natural Resources Conservation Service makes no representation of the existence or non-existence of utilities. The absence of utilities on drawings does not assure that there are no utilities on the site.

Fill in the information below, sign and return this sheet to our office in the enclosed envelope as soon as possible. Forward the attached form to your excavator (if other than NRCS) for completion. Subsurface investigation or construction cannot begin until both parts of this form are returned.

NRCS Representative

Are there any above-ground utilities in or close to the area where the conservation work will be done?

No ____ Yes ____ Type of Utility & Company _____

Are there any buried utilities in or close to the area where the conservation work will be done?
